

Attention Medicare Patients

In an effort to provide you with 24 hour access to a team of medical professionals, Georgia Nephrology has partnered with ChartSpan (an outside company). They will be calling you on our behalf to help you with your medications, appointments and any other questions you have about your healthcare. While you are not required to enroll in this program, we recommend that you do.

The goal is to keep you healthier by staying in touch between your appointments. If you enroll and decide you do not want to participate, you may unenroll at any time. Program brochures are available at our offices, should you need further information.
